

Snapdragon® X Series

Snapdragon® Control Panel

Release Notes | Install Instructions
2026.2.0.0

What's new in Snapdragon Control Panel 2026.2.0.0

🌟 User interface improvements

- Redesigned **Game Library** navigation to be more consistent and intuitive, including clearer favorites add/remove behavior.
- Redesigned the **Software Update** page with a consistent experience for Snapdragon® Control Panel, Adreno GPU drivers, and Hexagon NPU drivers.
- Improved update status feedback so users can more easily understand available updates and current installation state.
- Removed the top-level back button to simplify navigation.
- Expanded the clickable areas for items in the Help dialog.
- Added support for saving and restoring the navigation sidebar state.

🧠 Hexagon NPU driver updates

- Get access to the latest **Hexagon NPU driver** releases directly from Snapdragon® Control Panel.

🎮 One-Click Game Optimization robustness improvements

- Improved the reliability of **One-Click Game Optimization** workflows, including optimization, revert, and refresh behavior.
- Note: One-Click Game Optimization is currently supported only on Snapdragon® X devices.

🔧 General improvements and bug fixes

- Includes additional reliability, usability, and maintenance fixes across Snapdragon® Control Panel.

Installation Instructions

1. Snapdragon® Control Panel requires a .NET 9.0 Desktop Runtime. Please download and install the latest version of .NET 9.0
 - a. [Download .NET 9.0 Desktop Runtime - Windows Arm64 Installer](#)
2. Go to [Qualcomm Software Center](#) - Download the latest installer.
 - a. Snapdragon® Control Panel is now fully public, so there is no longer a requirement to register & login to download.
3. Launch SnapdragonControlPanel_2026.2.0.0_ARM64.msix and click “Install”

4. After successful installation, Snapdragon® Control Panel application will launch. Accept the EULA and enjoy Qualcomm Snapdragon Control Panel!

Update Behavior for Beta Users

If you have a beta version of **Qualcomm® Adreno™ Control Panel 2025.1.0.1** installed, the latest version **Snapdragon® Control Panel 2026.2.0.0** will automatically replace the beta version. Your existing preferences and Graphics Profiles will be migrated seamlessly during the update.

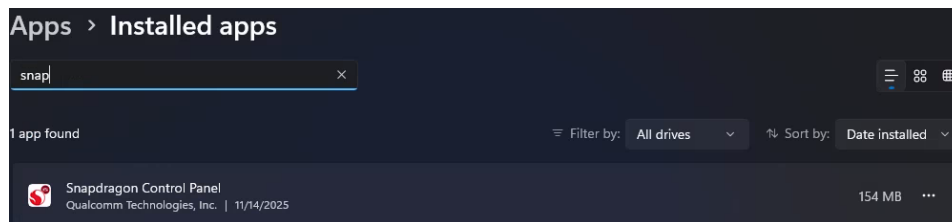

Known Issue

- If Graphics drivers are uninstalled while the Snapdragon® Control Panel is open, the app screen may go blank. Simply restart the application after the drivers are removed to restore normal functionality.

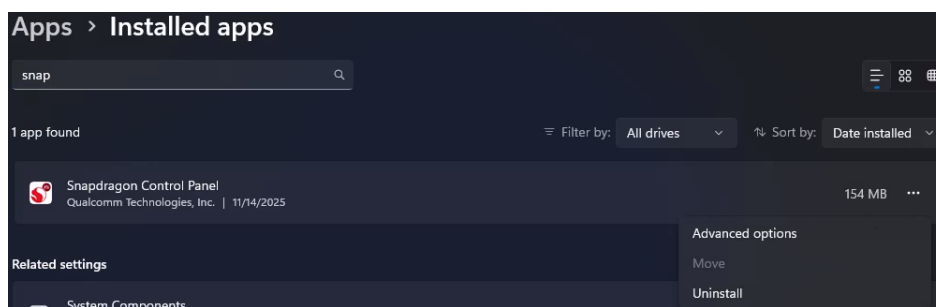

Uninstall Instructions

To uninstall the **Snapdragon® Control Panel** application,

1. Open **“Add or remove Programs”** from Windows start menu and search for Snapdragon® Control Panel

1. Click the **“...”** and choose **“uninstall”** from the drop-down menu to remove Snapdragon® Control Panel application.
