

## VIPRE Endpoint Security Cloud

### The Ultimate Cyber Defence for Small and Medium Sized Businesses

VIPRE Cloud is powered by next-generation advanced machine learning, one of the world's largest threat intelligence clouds and real-time behaviour analysis. It protects against ransomware, zero-day attacks, phishing, exploit kits and other malware that easily evades traditional signature-based antivirus. This is all delivered through a secure cloud infrastructure, designed to deliver the most reliable and secure cloud endpoint security platform on the market.

### The Highest Rated Malware Protection Delivering the Best Value

VIPRE has consistently achieved an Advanced+ rating in 2016 and 2017 from the industry's most comprehensive and rigorous testing authority – AV-Comparatives.

#### Threat Intelligence

Layered security approach ensures efficient, accurate and deep coverage against the widest variety of threats.

#### Lightning Fast Deployment

VIPRE Cloud can be purchased, configured and deployed in a matter of three clicks and less than 10 minutes.

#### Operational Efficiency

Unrivalled visibility into the health status of your hosts in real-time, allowing you to spend less time troubleshooting whilst maximising overall efficiency.

#### Dynamic Dashboards

A broader, deeper view of your computing environment, delivering vital information quickly.

#### Zero Infrastructure

No hardware to manage & maintain, it's all in the cloud.

#### Easy Installation

Hassle-free installation of VIPRE Cloud Endpoint with seamless removal of your existing endpoint solution.

### A Seamless and Efficient Endpoint Security Solution

- Top-rated anti-malware
- Intuitive dashboards
- Advanced ransomware prevention
- Clear, easy to understand policies
- Next generation advanced machine learning and behaviour analysis
- Zero-day and unknown threat prevention
- Intelligent anti-phishing and anti-spam defences
- DNX, URL and network packet inspection
- Browser and application exploit defence

## A Broader, Deeper View of your Security Environment

VIPRE's dynamic dashboard delivers a comprehensive look at the current status of the endpoint environment. With detailed views of infected vs. uninfected scans, threats found and their severity, top 10 infected machines, threat categories and more, the dashboard presents a clear view of what's happening at all times.

## The VIPRE Cloud Dashboard

The VIPRE Cloud Dashboard has been designed to make managing your endpoint security simple. It gives you an overview of everything you might want to know, highlights things that might need your attention and allows you to delve deeper with a single click on any piece of information. It's one of many reasons our customers recommend making the switch to VIPRE Cloud Edition.

## Technical Specifications

EARLY BLOCKING	
Malicious domain and URL Blocking	✓
Client Firewall	✓
DEEP SCANNING	
File/Attachment Scanning	✓
On-Access Active Protection	✓
Pre-execution Behaviour Analysis/HIPS	✓
Malicious Traffic Detection (IDS)	✓
Exploit Prevention (via PM/AAP)	✓
Email Anti-phishing	✓
Email Anti-malware	✓
ACTIVE THREAT HUNTING	
Runtime Behaviour Analysis/HIPS	✓
Advanced Active Protection (ML Behaviour Analysis)	✓
Ransomware and Zero-day Detection	✓
Low CPU and Memory Usage	✓
MANAGEMENT	
Centralised Policy Management	✓
Mobile accessible Cloud Console	✓
Management Reporting	✓
PLATFORM COVERAGE	
Windows	✓

### The Benefits of Moving Your Endpoint to the Cloud

Thinking about moving but unsure of the benefits? Here are five.

#### 1. Lower Maintenance and Administration Costs

As with all cloud solutions, you reduce time spent managing and updating your Cloud Endpoint Security over that needed for on-premises solutions.

#### 2. Minimise Downtime

With on-premises solutions, the hardware and the network it sits on are your responsibility, but with cloud Endpoint, the responsibility moves to your supplier and as a result your downtime is minimised. This also means you have one less server to manage.

#### 3. Get Updates No Matter Where Your Users Are

As long as your users have an internet connection, they can get the latest security updates. With an on-premises solution, they will be protected, but not always up to date.

#### 4. Gain Flexibility to Grow

The cloud is scalable, if you grow, simply add more devices. There is no hardware to scale at your end.

#### 5. The Cloud Effect

When a virus or malware hits anyone in the cloud, everyone in the cloud benefits from the fix - immediately. You are no longer a single entity, with distributed cloud learning and updates everyone is protected from all known threats sooner.

### What the Critics Say

"VIPRE (Cloud) has one of the cleanest interfaces that we have encountered in years... It is minimalistic yet completely functional, a nearly perfect design."

**John Breeden II**  
Tech Writers Bureau

"VIPRE Endpoint Security Cloud provides a very simple, easy-to-use console that makes deployment and everyday management of endpoint security software quick and straightforward."

**Business Security Report 2017**  
AV-Comparatives

"Even less-experienced administrators will find both the management console and the endpoint software very clear and intuitive, making the product an ideal choice for smaller businesses without full-time IT Support."

**Business Security Report 2017**  
AV-Comparatives
